HIDE A HOSE

SIMPLICITY

No need of storage space for your hose. It automatically stores itself inside the piping system, right behind the inlet, with just the suction power of your central vacuum.

EFFICIENCY

A hose behind every inlet. Your central vacuum is always within your reach. You can therefore take advantage of its power to clean occasional dry messes in an instant!

SPEED

No hose to carry from inlet to inlet. The HIDE A HOSE by Donvac is more convenient for quick clean ups than a traditional hose. Pull out just the length of hose you need and make it disappear behind the walls within seconds after your cleaning!

HIDE A HOSE system is the new revolutionary design to hide a hose in your wall, open the inlet, pull out the hose from the wall and start your vacuuming, when finished release the hose lock and the hose disappears into the wall. IT'S THAT SIMPLE.

SPECIFICATIONS & WARRANTY

Cleaning Power	Electrical Specifications	Maximum Airflow	Maximum Vacuum
1100 AirWatts	2981 W, 13 A	50.0 L/s 180m ³ /h	5334mm H ₂ O 52.3kPa
Dust Canister Capacity	Filtration Bag Capacity	Dimensions (H x W x D)	Warranty

25 Years

WARRANTY FOR VACUUM UNIT COMPONENTS INCLUDING 6 YEARS ON LABOUR

All parts of your Duovac vacuum unit are warranted against manufacturing and/or functional defects for the lifetime of the product. The lifetime of a Duovac central vacuum unit is estimated at twenty-five (25) years from the original date of purchase at an authorized Donvac dealer.

For the first six (6) full years from the original date of purchase of the vacuum unit, labour costs will be the responsibility of Donvac. At the end of the six (6) years, labour costs will be charged to the owner. See "Conditions and details of the warranty" for normal use conditions covered by this warranty. The lifetime warranty is valid for residential use only. The lifetime warranty does not apply for any commercial or industrial use.

All warranties are back to base basis.
